The basic data is as follows for the az80 type of shredders

We call this our 34 Series

3434 shear shredder

It is a heavy duty dual shaft shear shredder

The design and specifications on the unit that are critical for evaluation are :

**Shaft center design – 13” on the center to center distance which
Allows for a 5.5” shaft on the flat and 17.5” on the tip to tip**

Distance for the cutter (double hook)

Frame design – dual drive with vertical shaft removal design

Typical shredder length – 104”

Typical shredder opening length - 52”

(for pallets and tires)

Extended shredder opening for recycling oversize materials – 62”

Multi-purpose shredder opening for cost savings – 34”

Typical shredder width – 55”

Typical width of shredder opening which is based on the center to

Center distance of the shafts which is 13” and is typically 32” to

40” for most applications. Standard width is 34” on this machine.

Models :

52-32 MODEL

42-32 MODEL

34-34 MODEL

Other models designed on request

Total connected hp (horsepower of the unit) is normally 10 hp to 150 hp depending on the rpm of the shafts and the torque needed for shearing.

Our shredders have ability to use super low hp to provide shredding of materials when the volume is not demanding or high.

Price range of these machines if built in our usa factories is about \$80,000.00 to \$150,000.00

Price range of these machines if built in our asia factories is about \$40,000.00 to \$80,000.00

Pricing depends on the throat opening, the hp and shaft speed, the cutter width and other factors such as ram feed hoppers and bomb bay screen discharge designs.

Base machine normally needs an infeed conveyor and a discharge

Conveyor but loading from a bobcat or loader and discharge to Pile area under shredder stand are other options that can be Used.

Price includes shredder, frame, hopper, stand, motors, gearboxes

And motor and starter control panel. A complete unit

Price is ex works and normal freight is in a 20 foot container for

Worldwide shipping.
